

Endura Thermolite

£22.99

Despite being one of the cheaper sets on test, Endura's Thermolites contain a Teflon fabric protector. Although not as effective as other water-repellant warmers we stayed that little bit drier and warmer when it was drizzly and wet on the ground than with regular warmers.

The silicone grippers at the top and bottom meant there was no issue of them falling down, although the thigh gripper was rather tight.

A decent set of reasonably priced leg-warmers, but only available in two sizes
