ENDURA DELUGE GLOVES

★★★★★ £35.99

Weight 128g **Sizes** XS, S, M, L, XL

Keeping your hands warm and dry is essential during winter riding, particularly on longer rides where the extremities are more likely to feel the cold. The Deluge gloves are fully waterproof and windproof thanks to an internal membrane that sits between the hard-wearing Cordura outer and soft, cosy interior. They're surprisingly light given the conditions they're designed for, and are well sealed with a neoprene cuff and Velcro strap. Three small gel pads help prevent numb hands, and there are silicone prints on the braking/shifting fingers. Reflective detailing and a sweat/nose wipe complete these great-value gloves. →
