Endura Singletrack II £26.99

SPECIFICATION: Sizes: XS-XL / Contact: endura.co.uk

The Singletrack II is a sturdy trail glove featuring a nylon upper, stretchy neoprene cuff, and padded reinforcement between the thumb and forefinger that extends across the Clarino palm and down to the heel of the hand. It's not light, nor super-breathable (we've made good use of the Monster Terry sweat wipe) but definitely feels secure. The Singletrack II is the perfect glove for a first-timer: hard-wearing, protective and warm enough for year-round use.
