endura.co.uk

Quite simply the most effective overshoe here for both warmth and fit. Imagine trying to get a shoe-shaped wetsuit over your feet and you've an idea of how tightly they fit. Such is the super-snug fitment of these tough neoprene covers that there's no need for any fasteners – they stayed secure on our bib tights for a two-hour ride. Reflective logos on the outer side of the shoe covers are a bonus, too. Factor into all of this the price, and you're looking at a clear winner. **OVERALL** ■ ■ ■ ■ ■
