

3 ENDURA FS260 PRO NEMO GLOVE

£27.99

endura.co.uk

Wetsuit-style neoprene gloves are available from several manufacturers but these are the favourites of our northern test crew. The stretchy neoprene is thin enough to avoid hand ache and stay comfortable on longer rides or even through cyclo-cross races. There's plenty of all-weather bar grip too. Even though your hands will get soggy and salty very quickly from rain or sweat they insulate extremely well even when damp so as long as you keep your body warmth up, your hands should be fine. Well priced and well made too.
