The garish green Endura FS260-Pro Nemo gloves won't be for everyone, but the fit and quality almost certainly will.

The Nemos are soft and supple enough for easy gear changes as well as managing to combine warmth with the necessary breathability, all in a snug-fitting glove that won't slip an inch. They can leave your hands feeling wrinkly and soggy after a long ride in the wet, but you'll never feel a loss of warmth.

Superbly made at a decent price, most will be pleased to know that they're also available in black... RW
