

## ENDURA WINDCHILL HEADBAND

► **WHAT THEY SAY:** Head and ear-warming headband from Endura. Complete with screen print graphics.

► **WHAT WE SAY:** Available in two sizes, our Mekon-headed tester found the larger of the two to be a good fit. Although constructed from four panels, the flatlock stitching used throughout meant there was no rub or discomfort, while the material used – water-repellent Teflon on the outside, fleecy Thermolite on the inside – affords plenty of stretchiness. Detailing to the front and rear adds a couple of splashes

of reflectivity while the swooping cut at the front of headband means your earlobes are kept snug without compromising your ability to see properly. Comes in black and sizes S-M and L-XL.

£13.99

### VERDICT

Does a superb job of keeping out the cold. Simple, unfussy, but highly effective.
