

Endura Pacu £79.99

Another set with light-reacting lenses. Full tint change takes an estimated eight seconds, and the lenses have an 'anti-fog' finish, which didn't really live up to its billing. For us, the frame sat a little

too close to the face and felt a little restrictive, and this wouldn't have helped with de-misting. The lens did work very well in varying light, though, even in twilight.
