# Endura SingleTrack socks

## £12.99

---

**Thanks to the** soft Meryl Skinlife yarn used in Endura's SingleTrack socks, they're seriously comfy and, during testing, never felt too hot, even on warm days. There's plenty of stretch, which means they hug your feet tightly, though sizing is OK rather than perfect. The S-M socks are supposed to cover feet from UK5 to 8.5, but testers at the top of this size range found they still had some excess material just above the heel. Thankfully, this didn't affect their comfort. The SingleTracks wick sweat well, dry really quickly and won't stink out your kit bag after one use. **Rob**
