

ENDURA XTRACT

£52.99 The 300g Xtract is Endura's entry-level all-round helmet and comes with a removable peak that's ideal for wet days and trail riding. Being made in Scotland it's no surprise to see an integrated insect net covering the main front vents. The one-hand micro adjustment works a treat and there's also vertical adjustment available. The compact chin strap sits well, is quick to adjust and stays in place with lock-down cams. Endura has fitted a three-

mode USB-charge LED light in the rear that helps for flat light days. It's a good package that works for most riding duties. endura.co.uk
