

ENDURA PRO SL

★★★★★ £149.99

Weight 267g **Size** L-XL (58-63cm) **Colours** White; hi-viz blue; black **Sizes** S-M – L-XL

Endura's Pro SL helmet features an EPS core with a polycarbonate shell covering all of the base and leaving little EPS visible. But it's still very light, in part due to its use of Koroyd's engineered tube structure for impressive crash protection and ventilation. Five large Koroyd panels are integrated within the lower EPS core, and held captive by an outer EPS/polycarbonate shell, with a raised central port to allow continuous airflow from front to back. Twelve major vents are supplemented by two that are specifically for eyewear storage. Fit is great, and the aligned Koroyd tubes give extensive, indirect cooling across much of the head.
