

# ENDURA FS260-PRO PRINTED

**£59.99** > Racy figure-hugging design

**SPECIFICATION** SIZES S-XXL

**E**ndura's FS260-Pro Printed has a very race-orientated cut. The long Lycra arms are some of the most skin-hugging on test and have a thin strip of silicone to prevent them riding up. The body is similarly close-fitting, wicking sweat away from the body well, and the underarm fabrics provide a decent amount of ventilation, though it's not the coolest jersey on test. An elasticated hem with a silicone strip stops the jersey riding up, and three rear pockets are joined by a security pocket that could be a little bigger – but that's our only minor complaint. Overall it's a great jersey and the price isn't bad either, well below many others.

**HIGHS** Well thought out, construction  
**LOWS** Security pocket quite small

**CYCLING RATING**
