FS260-PRO JETSTREAM III JERSEY £67.99

1

The Jetstream may not be waterproof but it scores highly for just about everything else. The torso, high collar and the arms' front panels are made of a windproof material that does a very effective job while keeping the bulk down to a minimum. The rest of the garment is made from a thin, fleecy Roubaix fabric that keeps you warm and adds stretchiness to ensure a good fit. The sizing is on the large size, but the Jetstream is well cut and its premium feel belies its very reasonable price. ★★☆☆☆
