

# Endura Transrib High Neck

£39.99 Endura [www.endura.co.uk](http://www.endura.co.uk)

**AS WE'VE COME** to expect from Endura, this is a hard-working and straightforward baselayer that just gets on with the job. Made from COOLMAX fabric, which does what it promises and wicks effectively, it does feel synthetic to the touch but once on it's comfortable against the skin and soon became a favourite for longer rides. Not least because of the high neck, which gives that extra bit of protection. The zip is handy when

you do warm up and there's a zip hood to stop the puller digging into your chin. It's a small detail but one that elevates the Transrib beyond the ordinary. Together with the offset side seams, long hanger for airing between rides and antibacterial finish it shows an attention to design detail that's proven in the wearing.
