

Endura FS260 Pro bibshort 208g **£74.99**

A supportive pair of shorts with a wide gripper that was firm yet flattering on the leg. The 600 Series chamois ticks all the boxes in terms of comfort. The bib straps stayed put, but the bridge across the nape of the neck did apply a bit too much pressure for our 5ft 7in tester. With an integrated zip across the back, these bibshorts overcame concerns regarding comfort breaks mid-ride, but the rigid nature of the zip created a pulling sensation when pedalling — a feeling that may annoy some.

**A zip design aids
simple comfort
breaks but try
before you buy**
