

ENDURA PAKAGILET II

► **WHAT THEY SAY:** An ultra packable showerproof layer that can easily be stowed away.

► **WHAT WE SAY:** Made from super-lightweight polyester, this gilet packs in a fair bit for the price. Water resistance is limited thanks to its mesh back panel but solid front panels keep the wind out impressively. It's also elasticated at the rear of the neck, around the arm holes and along the waist to ensure the elements stay on the outside. Its fit is comfortable with the elasticated mesh panel at the back helping it to hug your shape. There are no pockets but there is a rear flap that allows access to your jersey's rear pockets, while subtle

reflective details on the rear, the shoulders and along the zip seams mean you'll also get seen by car headlights. It even comes with its own carry pouch with elasticated drawstring. Available in sizes XS-XXL and red, black or fluoro yellow.

VERDICT

By far the cheapest here but it gets the nod because it gets so much right. If you're on a budget look no further.
